

50mW 808nm Line Laser Module

VM-0808F-050M-GL-0A0

Features

- Uniform and detail-oriented
- No stripes & No noise
- Compact, small size
- Low thermal resistance
- High power conversion efficiency

Applications

- Machine vision
- 3D measurement
- Indication and positioning
- Smart housing system
- Sweeping robot

Description

This product VM-0808F-050M-GL-0A0 is integrated by in-house manufactured & high-quality laser diode and is shielding with copper for better heat dissipation. Compared with traditional laser and LED, it enables to provide a higher peak power and lower power consumption, low wavelength drift with temperature and good reliability. It provides narrower emission angle without optical and thermal compensation, which allow to operate a wider range of environments. This product with laser diodes with small-sized, light, low price, long life, low power consumption and fast frequency response. It can be applied to infrastructure alignment, positioning, indication, inspection, machine vision and other fields for ideal invisible laser source.

PRODUCT IDENTIFY

Part Number	Description
VM-0808F-050M-GL-0A0	808nm Line Shape Laser module, Beam Divergence > 130°

CODE RULES

VM- 0808F-050M -G L - 0 A 0

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩

Annex, option=0
 Product version, A
 Accessories 0 = standard
 Shape, L= Line
 Angle, G = 110-140 degree
 Units, M =milliwatt
 Power value, 50
 Laser class: F=Class 1
 Wavelength, 808nm
 Product classification, **VCSEL Module**

I. Specifications

Parameters	Typical values		Unit	Remarks
	CW Mode	Pulse Mode		
Wavelength	808±10		nm	-
Peak Optical power	50	100	mW	Pulse-width =3.6us, Duty Cycle= 40%
Rated current	50	110	mA	-
Power consumption	150	118	mW	Average power consumption
Operating voltage	DC2.2-2.5	DC2.68	V	-
Storage temperature	-40 to +85		°C	-
Operating temperature	-20 to +60		°C	-
Waterproof	IP20		-	-
Dimensions	Φ8×L11		mm	See Mechanics
Beam spot	Line, linewidth ≤2mm		-	@100mm
Beam divergence	≥130		°	-
Laser classification	Class 1		-	-
Lifetime	50000		H	-
Weight	-		g	Customizable

Note: Electro-Optical Characteristic with a package or diffuser would require further evaluation. Values are based on limited sample size and estimated values.

II. Mechanic schematic

III. Laser Product Safety

The output power of this module is classified as class 1, one can refer to IEC 60825-1:2014 《Laser Product Safety: Part 1: Devices classification, requirements and user's Manual》.
